Nastavení v systému POHODA – výběr portu dle správce zařízení

The screenshot shows the 'POHODA Kasa Offline - [Hardware]' application window. The 'Nastavení čtečky čárových kódů' (Barcode scanner settings) section is active. The 'Sériový port' (Serial port) dropdown menu is open, and 'COM5' is selected, highlighted by a red arrow. Other settings include 'Parita' (Parity) set to 'nic' (none), 'Počet datových bitů' (Data bits) set to 8, 'Počet stop bitů' (Stop bits) set to 1, and 'Rychlost přenosu' (Baud rate) set to 9600. The 'Zvukové oznámení' (Sound notification) checkbox is checked. Below the settings, there are two sound notification paths. In the background, the Windows Device Manager window is visible, showing the 'Porty (COM a LPT)' section. 'USB-SERIAL CH341A (COM5)' is selected, also indicated by a red arrow.
